document api swagger : <https://wabot.pesanku.id/api/>

WA MULTIDEVICE BETA

URL : <https://wabot.pesanku.id/>

SOCKET : <https://wabot.pesanku.id/wa-md>

Dokumentasi API : <https://wabot.pesanku.id/api>

Step To Connect WaCore :

- Register device menggunakan API
- Connect ke socket
- Scan QR
- Connect berhasil
- Kirim pesan

Untuk melakukan register device silahkan menggunakan api register device.

Berikut contoh dari response api register device :

```
{
  "name": "khadafi",
  "phone_number": "628561205976",
  "id": "sktwid4dkp47s5d7",
  "created_at": "2021-05-25T15:49:35.658Z",
  "updated_at": "2021-05-25T15:49:35.658Z"
}
```

Untuk mendaftar callback silahkan menggunakan API Callback

Contoh Post data Callback ketika menerima pesan dari WA:

```
{
  "device_id": "sktwid4dkp47s5d7",
  "meta": {
    "remoteJid": "6285277677761@s.whatsapp.net",
    "fromMe": false,
    "id": "3EB09534D13F9480E9BD"
  },
  "timestamp": "1623586389",
  "message": {
    "conversation": "ok"
  }
}
```

```
}
```

```
-----
```

API Send Message:

/wa-md/{id}/send-message

Parameter :

to : alamat tujuan (nohp, id group, id broadcast) (Untuk pengiriman multiple, dipisah by t
anda ,)

message : pesan

type : (group, message, broadcast)

```
-----
```

API Get Contact /wa-md/{id}/get-contact

parameter :

limit : 10 (limit data perhalaman)

page : 1 (halaman)

type : (group, message, broadcast)

API Send Message Custom

/wa-md/{id}/send-message-custom

--CUSTOM 1

POST : <https://wabot.pesanku.id/wa-md/2ew3mnu2stfl602xhju/send-message-custom>

PARAMATER :

```
{
  "to": "085277677761",
  "type": "message",
  "message": {
    "text": "oh hello there"
  }
}
```

--CUSTOM 2

POST : <https://wabot.pesanku.id/wa-md/2ew3mnu2stfl602xhju/send-message-custom>

PARAMATER :

```
{
  "to": "085277677761",
  "type": "message",
  "message": {
    "text": "Hi it's button message",
    "footer": "Hello World",
    "buttons": [
      {
        "buttonId": "id1",
        "buttonText": {
          "displayText": "Button 1"
        },
        "type": 1
      },
      {
        "buttonId": "id2",
        "buttonText": {
          "displayText": "Button 2"
        }
      }
    ]
  }
}
```

```

        },
        "type": 1
    },
    {
        "buttonId": "id3",
        "buttonText": {
            "displayText": "Button 3"
        },
        "type": 1
    }
],
"headerType": 1
}
}
--CUSTOM 3
POST : https://wabot.pesanku.id/wa-md/2ew3mnu2stfl602xhju/send-message-custom
PARAMATER :
{
    "to": "085277677761",
    "type": "message",
    "message": {
        "text": "Hi it's a template message",
        "footer": "Hello World",
        "templateButtons": [
            {
                "index": 1,
                "urlButton": {
                    "displayText": "★ Star Pesanku!",
                    "url": "https://pesanku.id"
                }
            },
            {
                "index": 2,
                "callButton": {
                    "displayText": "Call me!",
                    "phoneNumber": "+6285 776 77761"
                }
            },
            {
                "index": 3,
                "quickReplyButton": {
                    "displayText": "This is a reply, just like normal buttons!",
                    "id": "id-like-buttons-message"
                }
            }
        ]
    }
}
}
--CUSTOM 4
POST : https://wabot.pesanku.id/wa-md/2ew3mnu2stfl602xhju/send-message-custom

KONEKSI SOCKET

Event di Koneksi Socket

List Event Listener Server (Emit)

- connect-wa

Parameter yang harus di kirim ke server :

```

{
    "deviceId" : "2ew3lqsl01krwtdssb" (ID dari device)
}

```

- send-message

Parameter yang harus di kirim ke server :

```

{
    "deviceId" : "sktwid4dkp47s5d7" (ID dari device),
    "to":"6285277677761",
    "message":"test"
}

```

- disconnect-wa (Untuk melakukan disconnect terhadap whatsapp)

Parameter yang harus di kirim ke server :

```

{
    "deviceId" : "sktwid4dkp47s5d7" (ID dari device)
}

```

List Event Listener Client (Listen)

- qrReload

Event yang dikirim oleh server ketika ada QR yang harus di scan

Parameter : {qr:xxxx}

- connecting

Event yang dikirim oleh server ketika koneksi ke whatsapp sedang dilakukan

- connected

Event yang dikirim oleh server ketika whatsapp berhasil konek

- failed

Event yang dikirim oleh server ketika ada proses yang gagal

Contoh Code untuk Connect ke wa

```
this.socket.emit('connect-wa', { deviceId: this.deviceId });
```

- disconnected

Event yang dikirim ketika whatsapp disconnect dari device
